

# Cyberbullying

## What is Cyberbullying?

Cyberbullying is the use of electronic communication to bully a person, typically by sending messages of an intimidating or threatening nature.

Cyberbullying is bullying that takes place using electronic technology. Electronic technology includes devices and equipment such as cell phones, computers, and tablets as well as communication tools including social media sites, text messages, chat, and websites.

Examples of cyberbullying include mean text messages or emails, rumors sent by email or posted on social networking sites, and embarrassing pictures, videos, websites or fake profiles.

## Why Cyberbullying is Different

Kids who are being cyberbullied are often bullied in person as well. Additionally, kids who are cyberbullied have a harder time getting away from the behavior.

- Cyberbullying can happen 24 hours a day, 7 days a week, and reach a kid even when he or she is alone.
- Cyberbullying messages and images can be posted anonymously and distributed quickly to a very wide audience. It can be difficult and sometimes impossible to trace the source.
- Deleting inappropriate or harassing messages, texts, and pictures is extremely difficult after they have been posted or sent.
